

Amendments to the Specification

Please amend the Specification as follows:

Please replace the paragraph beginning on page 13, line 10 with the following rewritten paragraph:

In step 3, the SGSN transmits the Delayed Flag in a RAB Establishment Request to a RNC in a second network, ~~which is radio access network which may be a IP multimedia subsystem (IMS) network.~~ When receiving the Delayed Flag, the RNC checks the availability of radio access network resources. In step 4, the RNC sends RAB Establishment Response to the SGSN to indicate the result of the radio access network resource check.
